Cultsense - Learning & training event 2 - 6 & 7 oktober 2022

The second Learning & Training meeting of CULTSENSE took place on the 6th and 7th of October. This meeting was mainly about tools and methodologies to support the care provider. What already exists, what works well and what doesn't?

27 participants from 16 different Dutch and Belgian organizations came together for this. Care actors, knowledge and training institutions, project developers and local authorities were all represented.

This time we came together in Brussels and were also able to visit two interesting Brussels practices here: the international day center and housing project for the elderly Maison BILOBA Huis and the culture-sensitive residential care center Saphir.
